It is with great pleasure that I write these words in support of our Enterprise Security Framework development team that has worked for our company at Minsk Offsite Development Center - Insoft Engineering.

They have a great combination of technical skills, solid education background with strong knowledge of the newest IT industry trends. Not all development firms have that front-end, user-design knowledge to go along with their back-end development skills, so that made them really stand out.

Their project management is articulate, highly responsive, well-documented and organized. Without any doubt or reservation, I can confidently recommend this engineering team to you and your organization. They are highly dedicated and exemplary engineers who would be a benefit to any project.

Please feel free to contact me at +1 (617) 308-0424, or at raj@sriinfotech.com, should you like to discuss the team's qualifications and experience further. I'd be happy to expand on my recommendation.

Sincerely,

Raj Ponnuraj
President
SRI InfoTech, Inc.
